TETRA™

INTRODUCING

a revolutionary new Driving and Braking System (**DBS™**) to **safely** propel a manual wheelchair while actually improving your **health**

Webster's Definition:

Widget (wij/it), n. A small mechanical device, as a knob, switch, etc., esp. one whose name is not known or cannot be recalled; gadget. [alter. of GADGET]

SuperQuad's Definition:

Wijit®, n. A driving and braking device attached to a manual wheelchair that actually improves your health while amplifying your pushing power from a comfortable, stable, upright position.

Ergonomic features

- Quick Release
- Custom handle grip and shift grip
- Includes standard hand rim
- Forward and reverse drive, with neutral
- Compatible with anti-tip bars, grade-aids and parking brakes

Technical specifications

- Wheel Width: 3 3/4" (1/2" wider than a standard wheel)
- Disc Brakes
- Steering: 360° - pivot in place
- 2:1 Gear Ratio (1:1 Gear Ratio upon request)
- Durable, lightweight, aluminum and noncorrosive materials
- Maximum user weight of 265 lbs*
- Stainless steel spokes

Benefits

- Independently propel, steer and stop from a comfortable, stable and upright position
- Keeps hands clean and free of debris
- Reduces hand injuries (e.g., carpal tunnel syndrome)
- Amplifies pushing power
- Utilize larger muscle groups
- Continuous propulsion that reduces strain on user's shoulders
- Compatible with a wide range of manual wheelchairs
- Easier and safer to operate than standard push rims
- Promotes cardiovascular health
- Medicare and HMO approved
- FDA Registered
